I am opposed to HR4026 this is just another way for the government to try and control the American people. I drive over the road, the weather channel and the traffic updates in the large cities are very helpful in getting thru these metropolitan area's, the local stations give updates usually on the half hour if there is a big problem and then give the roads and if you are familiar with the area you know where this is, if not there is no way to try and get around it until you run up on it then you are stuck. By getting the report ahead of time you can choose a different route and thus avoid it, less traffic quicker clean up less headaches for law enforcement. Stop this from happening Again I am opposed to HR4026
